
Notes

1. DialogANswerProvider uses AutoEditStrategy to be able to put text into Dialog editor window to implement mixed initiative
2. AnswerCurationManager uses other backend components, orchestrates achievement of all functions
3. JenaBasedDialogModelProcessor extends JenaBasedSadlModelProcessor. The DialogAnswerProvider is used by both the UI and the backend.
4. JenaBasedDialogInferenceProcessor extends JenaBasedSadlInferenceProcessor, adding processing unique to Dialog grammar and to K-Chain and DBN invocation
5. User-driven way of initiating code extraction, along with associated text extraction, for demo purposes
